SUGGESTIVE THERAPY, D. C.
CHIROPRACTIC.

FOWLER ILLINOIS, Nov 22, 1903

Bauman Louis Belden

Dear Sir In Dec 1903. I have some correspondence with
you in regard to my insignia, and ^{later} need, a Book. Proceeding and
Papers of the 46 annual meeting of 1904

I am writing letters for information concerning a glass case
in which to preserve a historic Banner, now fifty years of age
and which on account of its deplorable ^{ed} condition we are having
mounted on a strong backing of Irish Linen

It will require a case 10 1/2 feet high, and 7 1/2 foot wide.
at the back, with an 8 foot high by 6 foot wide plate glass front.
In the case we wish to place, Books, and some printed matter, letters both
pen & type written, Photo and ambrotypes, a drum and possibly
some articles of Leather and Silk. The Banner is Silk the Eggs Bibles
and some Metal,

Should the case be lined with felt of some sort, or painted with enamel
paint? which is most desirable? Will the contents of the case, or the
contents be injured by being closed air tight? is there any
preference in the woods or materials for the back and floor the frame
being quarter sawed Oak? are some of the questions that have come up.
I will be thankful for any suggestions that will aid us in securing a proper
case. Thanking you. I remain respectfully, C. F. Hubert Adjt. of
the 50th Regt Ill. Vet. Inf. Reunions Assoc.
and member of 74th Committee.

November 27th, 1915.

Mr. C. F. Hubert, Adjutant,
50th Regiment, Illinois Reunion Association,
Fowler, Illinois.

My dear Sir:-

Your letter of November 22nd has been duly received, and I am glad to hear from you again.

Regarding the case which you are having made to contain the old flag and other relics, I should say in the first place that if this is made absolutely air tight the contents will be kept in much better shape than if it is not air tight. I would suggest making the back of the same kind of wood as the frame, and unless the color should not harmonize with the things that are in it, to have the interior of the natural wood with a dull finish. Of course, with a things of that kind, you have to be guided by the kind of background needed. A lining of felt is all right, or an enamel paint. Felt lasts longer if it is a color that will not fade, and if it is kept air tight so that the moths do not get in it.

Much obliged for the two ribbon badges.

Trusting that these suggestions will be of use, and with kind regards,

I am,

Very truly yours,

Secretary.
